

## Contract Manufacturing-High Mix / Low Volume and High Volume

The finished product is a cryogenic vacuum pump that incorporates embedded microprocessors to enhance performance, perform diagnostic routines and provide communication capability.

A full spectrum of services and processes were used:

- New product introduction facility/services
  - Assembly
  - Custom tailored testing processes
  - Conversion to RoHS when needed
  - Engineering for end-of-life component management
- 
- Certifications: ISO 9001:2000 and ISO 13485:2003 (medical industry)

**Lupton Associates** offers the proven ability to provide integrated solutions that meet the demands of design, time to market and product cost objectives.

The solutions we provide include:

- Prototyping
- Stamping
- Metal Fabrication
- Machined Components
- Polymeric Molding
- Electronic Manufacturing Services
- Casting
